ASX Announcement

ASX:**BH6** | 26 November 2026

Grant of 750km^2 Tenements to BH6

Exploration on Multiple High-Priority Targets to Commence Q1 2027

HIGHLIGHTS

- **CONFIRMATION OF GRANT OF TWO STRATEGIC LAND PACKAGES** – Regional exploration tenure expanded by 100% to more than 1,500km^2 following grant of two Exploration License Applications.
- **EXPLORATION TO COMMENCE ON TWO MAJOR HISTORIC HIGH-GRADE GOLDFIELDS IN Q1 2027** – Geological mapping, surface sampling and geophysics programmes will initially focus on the Manna Hill Goldfield, recorded historic production of circa 3,400oz at 18g/t Au[1], and the Waukaringa Goldfield, recorded historic production of circa 45,000oz at 23g/t Au[2]k following completion of statutory heritage agreements and environmental permitting.
- **EXPLORATION MOMENTUM AT WHITE DAM PROJECT CONTINUES** – Diamond core drilling on the recent Icebreaker Au-Cu discovery is in progress[3], with 4 core holes now complete and a 5th hole in progress. RC drilling to upgrade and expand the shallow Icebreaker oxide Mineral Resource Estimate is complete and drilling has commenced on the adjacent Rolling Prospect to advance to MRE status.

Broken Hill Gold Ltd **(ASX: BH6)** (‘**Broken Hill Gold**’ or ‘**the Company**’) is pleased to provide an update on the strategic expansion of regional exploration on the Company’s 100% owned White Dam Gold Project (‘**the Project**’), 80km east of Broken Hill in South Australia’s Curnamona Province.

The Company submitted competitive tender applications for two Exploration Licences covering a combined 751km^2 in May of this year. The South Australian Department for Energy and Mining have advised the Company that it has successfully won both tenders[4].

The Exploration Licences (EL’s) have now been granted, and work is underway to prepare for exploration programmes schedule to commence early in 2027.

Both EL’s cover significant historical goldfields located 50km to 80km from White Dam, with recorded small-scale high-grade gold production over significant strike lengths on both fields dating back to the 1890’s.

Next Steps

Compilation and review of the historical exploration database and geophysical data for the new EL’s is underway to define priority areas and plan first pass programmes.

Broken Hill Gold's Managing Director, Matthew Boyes, commented:

"This is another significant step forward for BH6 as we continue to expand and consolidate a major new gold hub in SA within the vicinity of the White Dam project by securing a further 750km^2 of highly prospective ground over an area with proven historical production. This tenure is very prospective and materially adds to our current exploration portfolio with walk up drill targets on historic goldfields with no modern exploration. The addition of these 2 new areas has now increased out footprint in the province to 1,500km^2 of very prospective ground"

"These two blocks have been left dormant after multiple years tied up in litigation before being released for tender and to give a new motivated company the chance to explore and develop areas which have seen little to no exploration spend for at least 30 years."

"BH6 will now fast track all permitting required to start exploration on these blocks while continuing to grow our very exciting White Dam oxide and sulphide gold-copper project."

About Broken Hill Gold

Following the strategic demerger of its highly prospective North Queensland exploration portfolio, which included the Alice River and St George projects, the Company is now exclusively focused on its flagship White Dam Project in the exciting and under explored Curnamona province of South Australia.

White Dam provides Broken Hill Gold with a significant portfolio of exploration targets headlined by the exciting recent discovery of the Icebreaker sulphide gold-copper discovery. In addition, White Dam provides a clear, accelerated pathway to modest oxide gold production that aims to materially contribute to funding the Company's exploration initiatives. The project features established infrastructure, including open-pit mines, a heap leach facility, and a fully operational gold extraction plant, positioning the company to rapidly unlock value and fund future growth.

The Curnamona province is becoming some of the most prized exploration ground in Australia with major companies now focusing on acquiring and exploring in the region. Broken Hill Gold has a unique early mover advantage due to having secured key tenure with outstanding potential for significant discoveries as well as a credible, staged path to production.

Competent Persons Statement

The information in this announcement that relates to Exploration Results is based on, and fairly represents, information compiled or reviewed by Mr Geoff Lowe, who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Lowe is the Company's Exploration Manager and holds shares and performance rights in the Company. Mr Lowe has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (**JORC Code**). Mr Lowe consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Forward Looking Statement

This ASX announcement may include forward-looking statements. These forward-looking statements are not historical facts but rather are based on the Company's current expectations, estimates and assumptions about the industry in which the Company operates, and beliefs and assumptions regarding the Company's future performance. Words such as "anticipates", "expects", "intends","plans", "believes", "seeks", "estimates", "potential" and similar expressions are intended to identify forward looking statements. Forward-looking statements are only predictions and are not guaranteed, and they are subject to known and unknown risks, uncertainties, and assumptions, some of which are outside the control of the Company. Past performance is not necessarily a guide to future performance and no representation or warranty is made as to the likelihood of achievement or reasonableness of any forward-looking statements or other forecast. Actual values, results or events may be materially different to those expressed or implied in this ASX announcement. Given these uncertainties, recipients are cautioned not to place reliance on forward looking statements. Any forward-looking statements in this announcement speak only at the date of issue of this announcement. Subject to any continuing obligations under applicable law and the ASX Listing Rules, the Company does not undertake any obligation to update or revise any information or any of the forward-looking statements in this announcement or any changes in events, conditions, or circumstances on which any such forward looking statement is based.
